

Transport of serumblood for rabies serology test to Central Veterinary Institute

We are the national reference laboratory for the Netherlands. We are assigned to perform the rabies serology for animals to or from every country in the world.

We need at least 3 ml blood or 1 ml serum (liquid of the blood). We prefer serum. Together with the bloodsample you need to send a submission form for rabies serology to be found on our website.

The test we perform is the FAVN (Fluorescent Antibody Virus Neutralization) test conform the OIE regulations.

When we receive the sample(s) it will take 8 till 12 working days to perform the test and send the results.

The costs of the rabies serology test in 2009 are € 43,70 per bloodsample (forty three euro and 70 eurocents). We also charge € 9,50 (nine euro and 50 eurocents) handling costs.

If you to send the sample to our laboratory, you have to send it as a diagnostic specimen (UN 3373) with a courier like DHL or TNT. They know how to pack and send these kind of samples.

Our Postaddress is :
Central Veterinary Institute
Dept. DSU
P.O. Box 65
8200 AB Lelystad
The Netherlands

Edelhertweg 15
8219 PH Lelystad
The Netherlands
